THE first

CITADEL

COMPENDIUM

AN IRREGULAR JOURNAL
WARHAMMER is the long-awaited dual system for fantasy gaming written by Citadel Miniatures' own Bryan Ansell, Richard Halliwell and Richard Priestly. Whether you enjoy role-playing adventures or mass battles, it's all here for you in this three volume boxed set. Simple enough for the novice to learn, yet meaty and innovative for the experienced gamer to enjoy.

WARHAMMER is available in better shops everywhere or, in case of difficulty, available post free at £5.95 from Citadel Miniatures, 10 Victoria Street, Newark, Notts. (Telephone: 0636 77495). Please make cheques payable to Games Workshop Ltd.
Welcome to the first CITADEL COMPENDIUM. Public demand has encouraged us to attempt to illustrate our entire range for the first time. We have opted for line illustrations in the main, as we find the printing of photographs in catalogues to be a rather unpredictable process, and we believe that drawings are the best way of letting you know what the models actually look like; we welcome your views on the subject! Of course, we can only show models available at the time of writing, Citadel's policy of systematically re-modelling the selection available across our entire range means that even as you read this the number of models available will have been changed and extended. Some codes will consist mostly of models from our old stalwart Fiend factory and Fantasy Tribe ranges, but we are reworking our new codes at a rate of about three a month, and you can be sure that in the near future you'll be seeing exciting new models of which ever subjects particularly interest you.

This brings us to the concept of the Citadel Compendium. The Compendium will allow us to regularly bring you up to date with our latest developments, it will take the form of an irregular journal; featuring complete current listings with illustrations. We will also take the opportunity to run articles on our models and related topics, and to publish scenarios, rules and additional material for WARHAMMER role-playing rules. Our staff are busy writing material for the next issue, but we hope that you, our customers, will be contributing too. We also hope to continue with our letters page, Eldritch Epistles, in the next issue, so please feel free to write with your comments, questions and suggestions, articles will also be very welcome. To avoid confusion, please address your correspondence to: Bryan Ansell, THE CITADEL COMPENDIUM, 10 Victoria St., Newark, Notts. Please be sure to use a separate sheet of paper from any mail orders etc.

Our plans for the near future include:-

More Runequest models, both individual models and boxed sets, including Runepriests complete with their familiars, re-made Dragonewts and individual monsters.

Some splendidly ferocious BUGBEARS.

Major re-working and additions to C01: Fighters, our most popular code.

New Diorama sets, including Engines of War with Fantasy Crews.

A new range of Dungeon accessories featuring chests, urns and other items.

Our first WARHAMMER supplements featuring army lists amongst other things. We're really excited about Warhammer, having been playing with them for over a year now, and have plans for printing several supplements, as well as running additional material in the COMPENDIUM.

ROGUE TRADER: our Science Fiction Role Playing Rules. We'll be re-making and re-titling our Spacefarers models to coincide with the release of these.

Some, hopefully most, of these should be ready to appear in the next issue of the CITADEL COMPENDIUM, together with a few surprises!

Best Wishes

Bryan Ansell

The Drawings and Photographs in this catalogue are not to scale.

### Cover Art
- John Blanche

### Incidental Artwork
- Tony Ackland
We've all been amazed by the response and enthusiasm which has greeted the launch of our own Games System - Warhammer, the rules that allow you to fight fantasy battles on the tabletop. The letters and ideas have been, quite literally at times, overwhelming. Groups of players all round the country have been using and adapting our rules to their own ends - and judging by your letters with some interesting results. Ourselves, well we are very happy to see our ideas expanded and modified - all very encouraging and bodes well for the future. Keep the ideas coming. Meanwhile we have arranged this selection of rules amendments and modifications which should clear up a few mistakes which crept into the rules. Occasionally we've found that what we wrote was not as clear as we intended - so a few words of explanation on vital points are included too.

THE TURN SEQUENCE

Vol 1 p5 says that both players may shoot in the Shooting Phase - this is a foul lie! in fact only the Active Player may shoot. The only exception is 'Return Fire' - see next section.

RETURN FIRE

In a players Shooting Phase other players may attempt to shoot with figures whose Bow Skill is 6 or more, Throw a D6, add 1 for each point of Initiative. If the result is 10 or more that unit or individual may shoot. This does not prevent them firing again in their own Active Turn.

FIGHTING DEFENSIVELY

This is an advanced alternative rule designed for games involving only a few (less than 10) models a side, although it is applicable to any sized game. Any character model - a Hero, Wizard, etc - may choose to fight defensively in combat. This means he forgets about trying to kill his opponent and just concentrates on parrying and trying to stay alive. This is particularly useful if you find yourself totally outclassed in combat. You must declare at the beginning of combat that you intend to Fight Defensively. Having done so you roll to hit as normal but with a +2 dice modifier - you will roll first even if your opponents Initiative is higher and he would normally have the first blow. If you succeed in hitting your opponent then you cause no damage - but your opponent may not attempt to hit you; you have 'blocked' his blow. You may fight defensively against as many individuals as you have attacks.

WEAPONS DIFFERENTIATION AND OTHER BONUSES

There are some of these listed on p 23 of Vol 1. More detail can be included in your games by introducing more bonuses to cover exotic weapons and situations. The following list summarises the factors given in Warhammer and includes a few new ones developed by ourselves and other players. You can cut this chart out and paste it into your copy of Warhammer over the existing chart.

New items which won't be familiar are Crossing Defended Obstacles and Heavy Weapon vs Shock. If you are attacking troops who are behind some sort of cover - such as a barricade, hedge or wall - then you will suffer a penalty of -1 'To Hit' and -1 'Initiative'. Once you have pushed back the defenders you have 'scrambled' over the obstacle and there is no penalty. If the defenders push you back then they don't have to follow over the obstacle - but the unit pushed back still retreats 2" as normal.

Heavy Cutting and Thrusting Weapons - basically two-handed weapons and heavy pole-arms - receive a +1 'To Hit' bonus when fighting troops in Close Order. This is because troops in close order have little room to duck or dodge.

An additional bonus which we have introduced into our own games is the +2 'To Hit' and +1 'To Kill' if you are Fighting Routed troops.
USING MOUNTED FIGURES

A few people have asked us to clarify the rules for cavalry and other mounted models. If the rider is mounted on either a Horse, Boar or Wolf, then it counts as cavalry. Cavalry receive appropriate movement for the type and a -1 Saving Throw. Attacks against the cavalry are worked out against the RIDER with the appropriate bonuses. If the Rider is killed then the entire model is removed from play. This is a convenient way of working out cavalry because it saves having loose horses wandering about the battlefield. If the rider is mounted on a Wolf then that animal may itself bite and claw against combat opponents - attack with Giant Wolf Initiative, Weapsnkill and Attack Strength. Opponents must still fight against the rider - this means that the Wolf could find itself being killed simply because the rider is killed. In the basic game we find this is fair enough because the rider/wolf combination is pretty powerful and the wolf is bound to be disadvantaged by having the rider on his back.

The only models actually designed to ride larger creatures are all either mounted on some form of Giant Riding Reptile or specially dealt with in the rules (Giant riding Elephant and Orc Riding Wyvern). If you wish to mount models on other large monsters, such as the Griffin, then use the same rules as for the Giant Riding reptiles. In combat the rider and creature both attack the enemy - but the opposition can only attack the creature. Once the creature is dead the rider is dismounted and may be engaged in combat.

Some players have indicated that they would like more detail for riding larger monsters and so we have developed the following rules. I must emphasise that these new rules are to some extent experimental -

1. All Mounts and Riders may be considered separate. In combat the Rider strikes a blow and the Mount also strikes a blow where appropriate. Normal Horses, Donkeys, Mules etc, don't strike a blow but trained Warhorses do.

2. Foot opponents may choose to either fight the Mount or Rider. If the Mount is so large that the Rider is out of reach of his enemies weapon then the blow must be struck against the Mount. Generally for foot opponents under 10' tall the Rider can be attacked if he is riding anything horse sized and not if he is riding anything bigger.

3. Where two mounted opponents meet in combat riders may attack either riders or mounts; mounts may attack only mounts. Riders mounted on horses or horse sized creatures may not strike blows against riders riding larger creatures. They must strike against the mount.

4. If a rider's mount is killed then Throw a D6.

   1-4 Rider is dismounted and must fight on foot. Place 2' behind combat. Fight on foot.

   5 Rider is thrown clear of mount. If the mount is hit roll a 5,6 on a D6 at the end of the Turn to break free. If attacked whilst trapped reduce Initiative to 1 and number of Attacks to 1 only. If you break free continue to fight on foot.

   6 Riders and mounts take separate Saving Throws - riders receive no bonus for being 'mounted'.

So a Dragon rider, for example, could charge into a unit of infantry. The Dragon will attack as normal, the Rider will attack as normal and the Infantry will attack the Dragon. If the Infantry succeed in killing the Dragon then the Rider rolls a dice to determine whether he is dismounted, thrown clear or trapped. Once dismounted he will continue to fight on foot.

If, for instance, a Griffin rider and a Hippogriff rider attack each other then the Griffin and Hippogriff must attack each other. The riders may choose to attack either each other or their opponents mount.

It is ultimately left to the GM to decide whether a mount counts as horse sized or bigger - but as a rough guide most monsters that can be ridden count as horse sized. For example Griffins, Pegasi, Unicorns, Hippogriffs, Manticores, Wolves, Boars, Carnivorous Birds, and Centaurs. Creatures which count as bigger should be fairly obvious, Elephants, Dragons, Giant Reptiles, Winged Reptiles and the 'riding' Wyverns for instance.

COMBAT FACTORS FOR TYPICAL MOUNTS

The Characters Profile Factors - Strength, Initiative etc. are not given in full on this chart. In this and further charts the Factors are abbreviated to save space.

```
M  Move  I  Initiative  W  Wounds  B  Bow Skill  S  Strength  T  Toughness
```

```
Warhorses (NI)  3  2  B  1  3  1
Horse (NI)      4  2  B  1  2  0
Giant Wolf (SI) 3  3  C  1  3  1
Giant Boar (NI) 3  4  D  2  3  1
Elephant        4  5  F  5  1  2
Unicorn (SI)    4  2  C  2  3  1

NI = Non-Intelligent / SI = Semi-Intelligent
```

ADVANCED RULE - DISMOUNTING OPPONENTS

If you are using the advanced 'Mounted Troops' rules then you can incorporate the rules given here if you wish. If you are attacked by a mounted model then instead of attacking the rider you may attempt to unseat him - flinging him from his mount and forcing him to fight on foot. You may only attempt this if you normally fight the rider and not if you can only fight the mount. First declare your intention to try to dismount your opponent. Then roll to hit normal. For each hit roll to 'dismount' - Roll a D6.

-1 If you are Lance armed
+1 If you charged or countercharged this turn

Then consult this chart:

```
1-2 No effect at all
3-4 You fail to dismount - Roll to 'kill' as normal but with a -2 dice modifier
5-6 You have unseated your opponent - Roll again on the chart below
```

Factors are abbreviated to save space.
Roll a D6 to determine what has happened to the dismounted rider.

1-4 Dismounted - continue to fight on foot  
5-6 Dismounted but with complications

1 Foot caught in stirrup  
2 Drops weapon - Disarmed  
3 Trampled by mount  
4 Flung to ground  
5 Concussed  
6 Knocked Out or Killed

If your foot catches in the stirrup you will be dragged 1D6 " by the mount and deposited as Concussed. Horse and similar mounts will always run away from the conflict. Aggressive and intelligent mounts will probably continue to fight in which case count as 'trample'.

Dropped Weapons may include shields (50% of the time) and may be picked up, or another one drawn, on the roll of a D6 - needing a 6 to succeed. Recovery increases by +1 per Turn and is automatic if there is a break in combat.

Trample involves - getting stood on... a lot. This can hurt, count as 1 Hit at the Strength Attack of the mount. So you'll probably survive being trampled by a horse - but a Dragon?

If you are flung to the ground take 1 Hit at a Strength Attack equivalent to the number of 'pips' on your Saving Throw from armour. 6 is 1 'pip', 5 is 2, 4 is 3 and so on. Riders flung to the ground may not get up that Turn and may only fight defensively.

If you are 'concussed' this means that you are flung to the ground as above. In addition you receive a blow to the head and become a little bit 'vague' - from now on you are subject to Stupidity for the rest of the battle.

Knock Out or Kill means that the rider has been rendered out of combat and should be removed from play. Roll for injuries after the battle if you wish - Vol 3 p16.

MORE MONSTERS:

THE UNICORN

Unicorns resemble large white horses with a single horn growing from the forehead. Unicorns are basically good creatures and semi-intelligent. They are very sensitive to a person's aura and will flee or attack if approached by evil or chaotic types. They will permit themselves to be ridden by Virgins, Paladins and some goodly heroes. They are magical creatures and have the ability to nullify all magic within 6" of them -magic simply won't work within this area. An enhanced spell cast against the Unicorn has a % chance of working equivalent to the enhancement. So if you enhance the spell by 20 Energy Points then it will have a 20% chance of working. Unicorns cast a magical Aura around them equivalent to a combined Aura of Steadfastness, Aura of Protection and banish Undead. So Unicorns and their riders are immune from Fear and Terror, the Unicorn has a 4,5,6 D6 Saving Throw and automatically destroys all Undead within 8" (except for Liches, Undead Heroes and Champions, and Personalities).

THE PEGASUS

A Pegasus is a winged horse - often a normal horse with a Chaos Attribute. Pegasuses are semi-intelligent and make excellent steeds if they can be tamed. A character requires a Willpower of above 8 to tame a Pegasus. Pegasuses can fight in combat in addition to a rider but if their rider is killed they will usually fly away.

MAGICIANS AND ARMOUR

Quite a few of you have expressed abject disgust and horror at the fact that we allow Wizards to wear armour without penalty (Shrieks of disbelief!). Well we have devised an Advanced Rule section to allow for reduced effectiveness of Wizards when wearing armour.

Wizards may not use shields and perform magic - they may carry shields into combat but then function as fighters with no ability to cast further spells until they remove the shield. Shields hinder a Wizard's ability to make the correct gestures for effective conjuration.

Wizards may wear armour - but the presence of metal armour will interfere with the Wizard's abilities, setting up bad vibes and confounding his magic. All Wizards wearing armour become subject to an increased Fumble Factor and must roll for a fumble everytime a spell is cast. Roll 2D6 as for a normal fumble. Tot up the modifiers that apply (Wounds etc) and add an additional 1 per Saving Throw 'pip' from armour. That is, if your Saving Throw is 6 - 1 'pip', if your Saving Throw is 5 - 2 'pips' and so on. Then if the score is 13 or more roll for a Fumble. This way the more armour a model has the more likely it is to 'fumble' a spell. Wrist Guards, the odd gorget and helmets don't add to the Saving Throw - so they don't make any difference to the Wizard, being quite small and mostly decorative anyway.
VAMPIRES

We didn't include rules for Vampires in Warhammer because we wanted to do a proper set of special Vampirism rules and didn't have the room to do it. But ardent fans of Transylvania's favourite son have asked us to account for our omission. To keep them sated I have assembled our Vampire rules as they stand to date.

Vampires are created by the willing transmission of the phenomenon from one Vampire to a Human, or, alternatively, it is possible for Vampirism to be inherited from one or both parents. Both events are very rare indeed - Vampires are solitary or monogamous by nature and demand exceptionally high standards of intellect and sophistication in their spouses and companions. For this reason Vampirism tends to be restricted to only a very few aristocratic families - occasionally taking human wives into the line. Female Vampires would never take a human spouse, although they may take human lovers.

There are minimum Personal Characteristics required to become, or be eligible to become, a Vampire.

| INTELLIGENCE | 10 |
| COOL | 12 |
| WILL POWER | 8 |
| LEADERSHIP | 3 |

The Vampire supplements his own Life Energy from that of his victims and sustains his life indefinitely. Life Energy is expressed in the same terms as a Wizard's Life Energy. A Vampire's Life Energy can be generated by rolling 1D6 Life Energy Points, the second attack 2D6, the third 3D6 and so on until all of the persons Life Energy is used up. A long term victim does not have to be of the opposite sex but a long term victim will die when their Energy reaches zero. A long term victim will rise up as a Vampire in their own right 3 days after burial. Generate the initial Life Energy Level D10x200. A Vampire created in this way will usually have emotional ties with the original Vampire.

A long term victim can be prevented from becoming a Vampire if buried with the appropriate precautions. The head must be cut off, and a lawful symbol of some kind placed around the neck and within the mouth. A chain of garlic flowers can be used in this context in conjunction with a cross.

Vampires may become Wizards in the same way as normal men - but cannot cast a Bless spell. Life Energy points will be expended as per normal but Vampires are unable to benefit from any magic that would increase or suspend their Life Energy. This means that Vampires make relatively weaker Wizards because of the excessive drain on their Life Energy.

Vampires have the ability to transmute into either Giant Wolf or Giant Bat form with a Were-factor of 2 (2 on a D6 to transmute) - each Transmutation, including back to man, uses up 1 Life Energy Point. In daylight the Vampire must revert to Human form or be destroyed. Vampires can acquire Life Energy from victims in any form - but must rest as the human form in their Coffin to 'synthesise' the energy. In Giant Bat and Giant Wolf form the Vampire has the normal attributes of that creature, so in bat form he can fly, etc. In Wolf form he can act as a Wolf Pack Leader and command upto 3D6 Pack Wolves. The Fighting Characteristics of each form are given below.

Vampires are characters and so their attributes may vary according to experience - the Fighter Advancement Thresholds can be used with 10x points for turning a victim into a Vampire and 2x points for killing and taking Life Energy. The maximum levels of character advancement do not apply. Typical Characteristics are given here and may be used on encounters if you wish, they are based on the premise that the Vampire is quite old and experienced.

Vampires need to expend Life Energy to prolong their existence beyond their natural life spans. The natural life span has ended as soon as the character becomes a Vampire - Vampires are 'Undead'. They are so powerful, however, that they are not subject to the normal spells and restrictions which effect Undead. To sustain their life requires 10 Life Energy Points per day, which can be cut down to 5 points per day if the Vampire remains in a comatose state in his coffin during the hours of daylight.

Vampires may acquire additional Life Energy Points only by feeding from the Life Energy of victims. Victims can be of two kinds - short term or long term. A short term victim is attacked and killed instantly and yields only a little Life Energy - generate by rolling 1D10 x 2. A typical Vampire will start off with from 200 - 2000 points.

A long term victim will die when their Energy reaches zero. A long term victim will rise up as a Vampire in their own right 3 days after burial. Generate the initial Life Energy Level D10x200. A Vampire created in this way will usually have emotional ties with the original Vampire.

Vampires may become Wizards in the same way as normal men - but cannot cast a Bless spell. PERSONAL CHARACTERISTICS IN SPECIAL SITUATIONS

The following situations are examples of how to use these factors, further situations can be dealt with by the imaginative Games Master as need arises.

Bluff - A character may attempt to 'bluff' his way through a situation, for example by pretending to be someone else or by pretending he is not responsible for some heinous event. His basic chance of succeeding will be 8xCool as a %. For example, if your Cool is 7 then you will have an 8x7 = 56% chance of success. The GM should feel free to add or subtract according to his discretion - for example if the player can come up with a particularly convincing or witty argument or if the situation seems relatively easy or distinctly tricky. If the character is trying to bluff a fusty old brainless individual (Intelligence below 4) add 10%, an individual subject to Stupidity add another 10% or a weak willed character (Willpower below 4) add 10%. If the character is trying to bluff someone with a higher Intelligence, higher Willpower or higher Cool then deduct 10% for each factor of each. For example if the guy you're trying to convince to let you in to a private assassins club has an Intelligence 2 higher than you, Willpower 1 higher and Cool 1 higher you must deduct 50% from your basic chance of success.

A few sample 'Bluffs'...

Trying to pass yourself off as someone else, a long lost son, a visiting wizard or the local tax collector - for example.

Trying to get into a building past a guard by pretending to have forgotten the pass word or to have an invitation. (The famous party crashing Bluff).

Pretending to have knowledge which you don't - for example pretending you know where the famous treasure of Mullah Aklan'd is buried.

Aklan'd is buried while Koboggle is away.

Durian Cogwheel, gentleman thief and wit, finds himself caught midrobbery (and half way up a drain pipe), by a local militiaman. He attempts to 'Bluff' the militiaman into pretending he is not responsible for some heinous event. His basic chance of succeeding will be 8xCool as a %. For example, if your Cool is 7 then you will have an 8x7 = 56% chance of success. The GM should feel free to add or subtract according to his discretion - for example if the player can come up with a particularly convincing or witty argument or if the situation seems relatively easy or distinctly tricky. If the character is trying to bluff a fusty old brainless individual (Intelligence below 4) add 10%, an individual subject to Stupidity add another 10% or a weak willed character (Willpower below 4) add 10%. If the character is trying to bluff someone with a higher Intelligence, higher Willpower or higher Cool then deduct 10% for each factor of each. For example if the guy you're trying to convince to let you in to a private assassins club has an Intelligence 2 higher than you, Willpower 1 higher and Cool 1 higher you must deduct 50% from your basic chance of success.

Suspecting that he is an insomniac plumber.

Mungum the Thief is trying to skillfully manoeuvre a Palace guard into divulging the whereabouts of the princess's bedroom, over a pint of 'Old Black Foul' and bawdy tales of Guardemere's exploits.

Regnauind, the trickster, is trying to persuade a local shopkeeper to subscribe to a new insurance scheme that he has just started.

Durian Cogwheel, having failed to 'bluff' the local lawman now tries to convince him to let Durian hold his Cudgel while he goes and fetches help.

Scringer, chief adviser to King Koboggle of Grump, is trying to persuade the King to lead an army to conquer his neighbours. Scringer intends to embezzle army funds while Koboggle is away.

SPECTRES

Spectres are the most enigmatic and powerful of the ordinary undead types - exceptionally difficult to kill, immune to magic attack and non-enchanted weapons and causing paralysis by touch.

Spectres are the spiritual remains of long dead men - lost souls who are held to the earth because of some age long vow or curse. Oath breakers in particular may be forbidden passage into the realms of the dead, and they are compelled to remain earthbound until their oath is completed. Sometimes a Spectre may owe service, to a lord or wizard, although once the service is completed the spirits are freed from their bondage. When encountered a Spectre will not generally attack - unless in doing so he is fulfilling his oath.

For example - the Wizard Comencratz has 5 bodyguards. One day an assassin sneaks into Comencratz castle, murders the guards and brutally slays the sleeping Wizard. The guards have failed to protect their master and Comencratz's son - Grangorok - calls upon the Spectres of the 5 Guards to return and do their duty protecting him from intruders. Now if another attacker attempts to slay Grangorok the Spectres will protect him, if they succeed then they may pass on (at the Games Master's discretion) - for example if the Games Master may decide that they may only pass on one at a time if he wishes).

Spectres are immune from non-enchanted weapons and attacks from most normal magic. They may be dispelled by a Necromantic Banish spell as normal, they may be dispelled by a normal 'Banish Undead' spell with a plus 3 'fumble factor'. They are effected by enchanted weapons - and a 'Blessed Weapon' will have normal effect.

Spectres causes FEAR within 15° and TERROR within 5° - on all normal living creatures. A Spectre attacks by touch and causes no damage - but has a paralysing effect. Throw to save as for Poison. If you fail to save against Paralysis then the victim becomes rigid and helpless - the effect lasting for at least an hour (606 Tuns). A Cure Light Wounds Spell will cure this condition. Player Characters hit by a Spectre may roll to see which part of the body has been hit - and loose the power in that part only. Use the Wounds chart to decide which bit has been hit. The Games Master can determine the exact effects depending on how the character is equipped - for instance a 'left-hand' hit, and the character would drop his shield/lantern or whatever.

PERSONAL CHARACTERISTICS - ADVANCED RULES

In the basic Warhammer game we left it pretty much up to the Games Master to determine a character's ability to handle special situations and perform extra-ordinary feats. We said that the Games Master should use the Personal Characteristics to judge any situation, giving a character an arbitrary chance of achieving an action and modifying according to his 'Cool', 'Intelligence', 'Willpower' or 'Leadership' depending on which seemed appropriate.

Well now we'd like to pass on some of the advanced rules we have devised to utilise these 'Characteristics'. These are only used in conjunction with the 'Personal Characteristics' of individual heroes, officers, champions etc. 'Other ranks' are all considered to have average characteristics.

COOL

A character's 'Cool' determines his temperament and ability to keep himself under control in stressful situations.

Characters with a Cool of 2 or less are always subject to Frenzy, and must make a compulsory throw when within charge range of enemy or when they are fired at. Rules for disregarding of armour while in Frenzy are waived for these unstable characters.

Characters with a Cool of eleven or more are NEVER subject to Frenzy, even if caused by magic.

Characters with a Cool of 12 are immune to Terror and Fear, even if caused by magic. They are also immune to 'Aura of Command' and 'Mind Control' Spells.

WILL POWER

A character's Will Power reflects his personal determination and self-possession. Accordingly characters with very high 'Will Power' levels (of ten or more) can be very resistant to magic. Such characters are termed 'magically resistant'.

Add the 'Will Power' of the magician casting a spell to his 'Mastery Level' (Magical weapons are mostly considered to have a Will Power of 10). If this total is less than the Will Power of the magically resistant character then he is entitled to a D6 Saving Throw. This will be 1 'pip' on the dice for each point advantage - 1 'pip' is 6, 2 'pips' 5,6 and so on. If he makes his Saving Throw then the weapon will count as a normal scimitar for that round of combat. More powerful magical weapons will have extra plus factors for 'mastery'.

Characters with a Will Power of 1 or 2 always take double damage or effect from magic.

For example: A magically resistant character, with a Will Power of 12, is attacked by a Fire Ball from a wizard with Will Power 8 and Mastery 2. Subtract the wizard's Will Power and Mastery 8+2 = 10, from the character's Will Power 12. This works out as 12 minus 10 = 2. This gives him a Saving Throw of 2 'pips' - or 5,6 on a D6. If the same character were to be attacked by a goblin wielding a magic scimitar with a +2 'To Hit' and +2 'To Kill', then this weapon would count as having a Will Power of 10. Our character must again make his Saving Throw to be immune to the weapon's magic powers, if he makes the throw successfully the weapon will count as a normal scimitar for that round of combat.

Characters with a Will Power of 10 or more.

Characters with a Will Power of 1 or 2 always take double damage or effect from magic.

LEADERSHIP

A character's 'Leadership' determines his ability to lead and organise other people. In units of troops the 'Captain' of the unit may add 1 to the Saving Throw against Fear and Terror for the whole unit if his Leadership Factor is 3. He may add an additional 1 for each Factor over 3. The maximum normal Leadership value is 4 for Men and Elves, 5 for Dwarves - so the maximum total plus factors would be +2 and +3.

'Captains' with a Leadership of 3 or more can try to stop units reacting to Hated Enemy - Roll a D6, you will need to score a 6 to stop the unit reacting for that turn. Add 1 for each point of Leadership above 3.

In combat the leader of a unit may challenge his counterpart in the opposing unit to a man-to-man combat. If you refuse a challenge then your Leadership value is reduced to 1. If the combat is accepted then the two models must fight each other - until combat is over or one of them is killed.

INTELLIGENCE

Characters with a high Intelligence receive a percentage bonus on the Experience Points that they earn. Characters with a really low Intelligence suffer certain penalties.

Characters with an Intelligence of 1 are subject to STUPIDITY.

Characters with an Intelligence of 2 or less are unable to acquire more than 1 skill - they will not be able to learn to read or write and suffer a minus 25% Experience Points penalty.

Characters with an Intelligence of 4 or less may not become Wizards.

Characters with an Intelligence of 10 receive a +10% Experience Points bonus.

Characters with high Intelligence may learn new Skills quite quickly, and Games Master may wish to take this into account in certain situations. For example a character with an Intelligence of 10 could have a 10% chance of being made supervisor of a workshop if he is working there, or a character working as a Sailor could have a 10% chance of being promoted to Mate and so on.

'OTHER RANKS'

Ordinary 'rank and file' members of a unit do not have to roll for their Personal Characteristics. They are considered to have average values - which are:

<table>

Citadel’s Mailing Club has grown apace over the last year - we now have almost one thousand members compared with a hundred or so this time last year. Those of you who are not yet members might be interested to know about our service. Mailing Club members receive advance information about new Citadel models - so you can keep up to date with all the latest releases. Sporadically we organise a Mailing Club Competition - in which we invite members to compete against each other in the field of painting, drawing designs or an interesting resume of their adventures. All of our competition winners receive a substantial prize of Citadel models, with many other prizes for runners up. We also produce 'Arcane Ramblings' - an occasional newsletter containing information on the latest models, hints on modelling and painting and Warhammer statistics.

Overleaf you will find our new Mailing Club questionnaire. It's quite a while since we had a questionnaire and it seemed a good idea to find out what you all felt about the future of the Mailing Club and our other projects.

If you would like to join our Mailing Club all you have to do is fill in the address boxes below and affix a 16p stamp in the space provided in each box. Each stamped address box entitles you to one mailing - if you like you can join for as many or as few mailings as you wish, just fill in as many boxes as you want mailings. We'll keep your address boxes and use them to send you your Mailing Club information as new releases occur. New releases are scheduled for once every two months but may be more frequently sometimes. When we run out of address boxes we'll send you another subscription sheet. If you would like to join but you live overseas then you can send us the equivalent cost of sending your information to you - this will normally be about 50p.

So there you are - we think that 16p is pretty good value for each of our Mailing Club packages and we hope you'll agree. Incidentally all of the packaging is done by Citadel staff but by 'homeworkers'. This means we cannot organise changes of address - so if you know you'll be moving house soon either only join the mailing Club for a few months or make sure you have your mail forwarded to you.
For the Citadel Compendium we've decided to organise a special Competition. First prize will be one each of every Citadel model released in April 84, worth at least £20 - runners up will receive special prizes too. All you have to do is draw us your own adventuring Warhammer character - you can use any of the silhouettes drawn below for Human Male, Human Female or Dwarf. You can use the Human ones for Elves. Fill in the details of clothing, weapons and equipment - you can even draw in any accompanying animal or demonic familiar if you wish. Then, when you have drawn in your adventurer fill in the 'Profile Sheet' and answer the questions given. We'll judge your entries in January and the entry which we find the most entertaining, the most amusing or the most sensational will win the first prize.

Feel free to use additional sheets if you wish.

Here are some of the ideas we have for future plans - obviously we'd very much like to know what you think of these projects. Sometimes your questionnaires make all the difference between us deciding to manufacture a certain model or not - so if you're waiting for a particular model of a particular beastie now's your chance. Please award each idea marks out of 10 depending on how good an idea you think it is.

Plans for the future are...

- More supplements for Warhammer.
- A special range of Chaos Monsters.
- Dungeon Accessories, Chests etc.
- Plastic vac-formed Dungeon scenes, walls, floors etc.
- More Boxed sets.
- More Warhammer Scenario leaflets for our boxed sets.
- A News Letter for our Mailing Club.
- A Contact List and News-sheet for Warhammer players.
- More Competitions.
- Rogue Trader Science Fiction Ship role-play rules.

What new models, books or games would you like to see from Citadel?
CITADEL’S MAIL ORDER SERVICE

Citadel's new Variable Choice System inevitably produces a few extra problems for our mail order customers. We hope the following information will help our staff to identify the models you require; even on the flimsiest information! In general the vast majority of models illustrated will be available. However, some models will inevitably be discontinued as we remodel the codes and omit those models which have not proved popular, and some moulds will inevitably wear, rendering some models out of stock until we re-mould, sometimes for a month or more. It is always best to make a note of the models you require in the Compendium and if you tell us that you'd like a female fighter in plate armour with axe and shield, then providing we make one, our mail order staff will certainly find one for you.

1) DESCRIPTION: Just describe the model you want; this often makes it easier for our mail order staff to find the model you require.
2) SKETCH: This is a more precise method; even a simple stick man drawing is enough to let us know exactly what you want.
3) PHOTOCOPY: This is undoubtedly the best method if you have access to a copier, or if you don't mind cutting up your Compendium. You can mark the illustrations of the models you require, with alternatives in order of preference, and even mark those models that you particularly DON'T want to receive. This makes us happy, and our mail order staff very happy indeed, as it makes their job much easier and quicker.

Having said all the above, we are very proud of our mail order service, BUT the ideal method to go about buying your models is undoubtably to visit your local retailer. Here you will actually be able to see the models on offer and be able to choose from the latest releases. If you do not have a local retailer, then your local model shop will probably be quite happy to stock our models if you just pester them a little!

THE MECHANICS OF MAIL ORDER

POSTAGE: We make a standard postage and packing charge of £1.50 on all orders below £10 value. Over £10 value postage is free.

OVERSEAS ORDERS: We successfully ship orders to overseas customers on a daily basis, so please don’t be discouraged by the distances involved. Overseas customers must add 25% for postage and packing. Payment must be in U.K. currency. Your local bank or post office will provide you with an air mail order service. We cannot offer an air mail order service.

DELIVERY TIMES: We try to put all orders back in the post on the same day that they arrive, so you should receive them within the service time. Some days the mail is just too heavy for us to deal with, and orders are held over, very occasionally we get a couple of days behind. The major exception to this is Christmas, a period of total mail order madness. If you order in November or December, please be patient. We MUST get it to us at the very beginning of December.

Very large orders (over £50) sometimes have to be held over for a day or two to complete. They also have to go by parcel post, which takes a little longer to reach the customer.

So, though orders will often be back with you in a few days, you should allow ten days before you start feeling concerned, two weeks if you have placed a large order. Orders are processed completely and accurate records of all orders received and despatched. If you give us a ring they will be able to tell you when your order arrived and when it went out. Mail Order is open on weekdays only between 9.30 am and 4.30 pm.

PAYMENT: Please pay by cheque or postal order. It really isn’t very safe to send cash through the post, and we certainly take no responsibility for it if you do! It is particular foolish to send change through the post; however it is wrapper, even sealed to bits of cardboard, it inevitably bursts through the envelope.

CREDIT NOTES: If a model you have ordered is out of stock, we can normally take the money you require from stock, or sent them up in a nice envelope. We will refund your money within one month of your order, but if you have not received it within 12 weeks, please let us know. We will refund your money on your first request.

DO NOT PUT THEM IN YOUR MOUTH

They should certainly NEVER be given to children under 10, and to any older children who you cannot trust not to suck them.

HISTORICAL MODELS

Citadel and Ral Partha manufacture a little publicised but quite large range of historical models for wargamers and collectors. A free list is available in return for a stamped S.A.E.

At present we manufacture:

- Ancient Romans
- Huns
- Mongols
- Chinese
- Byzantines
- Arabs
- Carolingians
- Lombards and Vikings
- 11th, 12th and 13th Century Medieval
- Gangsters
- Pike and Shot period Wars of Religion
- Landsknechts
- Swiss
- Turks

In the near future we should have new Maratha and Hundred Years War Medieval.

Our Ancient and Medieval warriors provide the Fantasy Gamer with a choice of literally hundreds of unusual models for use as men-at-arms.

Historical models are not held in stock, but are cast specially for each customer, this often means that they take a day longer to supply.

BREAKAGES AND MISTAKES

Yes, on rare occasions we have been known to make mistakes; fortunately they are quite rare. If you should receive a broken model, or if we have made a mistake on your order, simply return the goods. We will replace them and refund your postage, either by supplying you with new castings, or by cheque if you prefer. It helps if you return the orange packing slip giving your order reference number.

We will also replace models purchased broken or incomplete from any of our retailers, however, you MUST enclose either the receipt or the packaging the model was supplied in.

Unfortunately we cannot accept models for exchange for any other reason than they are imperfect or were wrongly supplied; we do not resell returned models.

LEAD: Our models are intended for collectors and as playing pieces for serious gamers. THEY ARE NOT TOYS.

Our Ancient and Medieval warriors provide the Fantasy Gamer with a choice of literally hundreds of unusual models for use as men-at-arms.

CITADEL MINIATURES CONTAIN LEAD, WHICH CAN BE HARMFUL IF INGESTED, THERE IS NO GUISE IF YOU ARE SENSITIVE.

Please!

DO NOT PUT THEM IN YOUR MOUTH

DO NOT BUY THEM FOR SMALL CHILDREN

They should certainly NEVER be given to children under ten, and not to any older children who you cannot trust not to suck them.

The alloy we now use, which we find ideal in terms of durability and fine detail, is sometimes subject to colouration. The castings are sometimes coloured in exciting shades of blue, bronze or gold. This in no way effects the model other than in giving it an unusual finish, and they take paint entirely normally.

At Citadel we do our utmost to provide the best possible mail order service to those customers who cannot get to a retailer.

We employ only enthusiasts to man our Mail Order Department, as we feel that only people already involved in the miniatures hobby will have the knowledge and awareness required to give a complete service.

If you have a problem, please don’t be afraid to give us a ring, if you have any suggestions as to how we can improve our service we’d be very happy to hear from you.

Best Wishes

Rick Priestley
Mail Order Manager
There is no shortage of articles on the subject of painting metal miniatures. However, the vast majority of these assume some previous experience on the part of the reader (not always by intent).

So for those of you who have yet to make a start at the art of burying fine cast metal miniatures under layers of paint, here is—

The Absolute Beginner's Guide to Painting Miniatures

Things you will need.

Paint - of the wide variety of types that may be used I would recommend the humble tin of enamel, if only because of its availability. Be sure to purchase the matt type (although some gloss black will prove useful). Also, a spray can of matt white will be required.

Thinners - the above paint may be diluted with white spirit or turps substitute.

Brushes - rather than take out a mortgage on the best quality sable. A relatively inexpensive synthetic-sable mix will do to start with. Buy a brush with the longest bristles you feel you can cope with. The less steady your hands, the shorter the bristles should be.

Modelling knife - a modelling knife and some spare blades will be essential.

Preparing the model.

Remember that an inadequately prepared model will always result in an inferior finish.

Carefully cut and scrape away any excess metal on the model.

Attach the model to some object that you can hold comfortably when you are painting it. One method is to use blu-tac, or similar, to attach it to the bottom of a paint tin.

Lightly undercoat the figure using the spray matt white. Do not try to achieve a brilliant white finish, you will only succeed in obliterating most of the detail on the model. A pale grey colour is all that is required.
PAINTING THE MODEL

Do not use the paint directly from the tin. Mix the paint thoroughly (a match stick or cocktail stick is useful for this), and place a small amount on an old dish or similar. Dip your brush in thinners, then dip it into the paint. (The plastic part of the Blister Pack makes an excellent receptacle for thinners). Grip the brush lightly and, using only the tip of the bristles, apply the paint to the model. Let the bristles follow the direction of any folds on the figure. Try to ensure that all your brush strokes are made in the same direction. It is far better to apply several thin coats of paint rather than one thick one, but leave sufficient time for each coat to dry thoroughly, as instead of applying a new layer of paint you will be merely lifting the previous coat off. If you wish to apply a light colour of paint over an area you have previously painted with a dark colour then undercoat that area with white paint first.

WASHES AND SHADING

Shading does not have to be difficult, and always improves the appearance of a model. First make a wash. All this consists of is a little paint mixed with some thinners. You will have to practice a while to get the correct proportion of paint to thinners. Washes are lightly brushed over the entire area to be shaded; the colour will run into any folds/creases and leave the raised areas clear. Even if you do not shade all of a figure it is well worth applying a brown wash over any flesh areas on a model, particularly the face. Leave a model to dry at least a full day before applying any washes.

IRON AND STEEL

To get a realistic look to areas that are meant to represent the above two metals, first mix some silver paint with some clear gloss varnish, and then paint on as per normal. When this is dry (leave it for at least a day) apply a wash of gloss black. You should have an effect similar to dull steel.

LAST WORDS

When painting fantasy models the actual choice of colours is very important. Try to get a look at some of the books of fantasy artwork that are available. Also, a good idea is to look through natural history books. A good many ideas can be got by observing the natural colours of living things. Above all try to avoid merely copying other figures you have seen.

MARK of CHAOS
SPECIAL OFFER!

We hope you are enjoying reading The Citadel Compendium - with lots of new models and special offers for collectors of our miniatures.

Now we are giving you a chance to buy three very special models indeed. These incredible miniatures are designed from the illustrations for Bryan Ansell’s Mark of Chaos article, and feature three different Chaos Creatures. These models can be ordered through your local retailer - just clip out and hand over this coupon together with appropriate funds, and we’ll include the models with our next delivery. Alternatively order through post, but please add 50p p&p.

It has become a convention amongst gamers that Science Fiction Games and Fantasy Games are somehow distinct and mutually exclusive. An odd situation, that in a hobby which promotes the imagination an irrational and avoidable barrier should exist. I have seen and participated in games in which the two genres have been mixed, and these have worked exceptionally well, keeping the players both amused and confused at the same time.

If you own a copy of WARHAMMER then you probably realise that the rules are designed to be used - if you wish change rules, redraw charts, invent new creatures ... anything should be possible, after all most of the enjoyment from a game comes from invention. And that - hopefully - is where I step in wielding a Laser Pistol and shouting 'Beware of Greeks bearing particle beam weapons'. Yes indeed, Science Fiction and Futuristic elements in general make a superb cross-over into any Fantasy Campaign. These can be worked very easily into the usual Fantasy contexts - an old technical civilisation could have left behind advanced artifacts, weapons, transports, gadgetry of strange and unknown kinds. Such artifacts can become vitally important to your adventurers, not quite understanding how they work - but being perfectly prepared to take advantage of the fact that they do!

In the following descriptions when I've used the word 'Turn' I refer to that player's Turn - the Active Player Turn in Warhammer. When I've used the word 'Move phase' I refer just to that part of a Turn in which the model is moved. So if an action takes 'a complete Turn' then the model may do nothing other than the action - he may not move, shoot etc. If an action takes 'a complete Move Phase' then the model may not move - but may shoot, combat and so on. With a bit of ingenuity these weapons can easily be adapted into any gaming system.

The Laser Pistol

Laser pistols make wonderful side arms for Heroes. A laser pistol can be fired once per Turn without affecting the weapon's 'regenerating batteries'. If the firer has sufficient attacks the weapon may be fired up to 3 times a Turn, at different targets if you wish. After firing this 'rapid fire' the weapon won't work for the following 2 Turns whilst the batteries regenerate. A Laser can be fired with one hand - like any pistol weapon. A Laser Rifle is a similar but larger weapon which requires two hands to use.

The Needler

The Needler is a powerful airgun which fires a steel needle, often poisoned or drugged in some way. The needles are carried in a magazine, each with up to 100 needles (D100 on finds), it takes an entire Turn to fit a new magazine. After each shot the weapon needs to be repressurised - this takes a complete Move Phase to complete. Every shot fires one needle perfectly, silently and very accurately, making this an ideal weapon for an assassin. Needlers can be built into ball-point pens, wizard's staffs, swords or almost anything.
The Hand Flamer

A Hand Flamer is a large pistol weapon with a canister attached underneath. The canister contains a highly volatile chemical which reacts violently with oxygen producing a flaming sheet of burning chemical which sticks to skin and clothing. These are really nasty weapons - unreliable too. When firing a Hand Flamer a roll of a 1 on the 'To Hit' dice means the weapon has exploded - roll a D6. 

1 The weapon is useless - you are unharmed
2 The weapon explodes causing a Strength 2 hit on you
3 The weapon explodes causing a normal Hand Flamer hit on you
4 The weapon explodes causing 2 normal Hand Flamer hits on you
5 The weapon explodes causing a normal Hand Flamer hit on anyone with 3w+ and 2 hits on you
6 The weapon explodes causing a normal Hand Flamer hit on everyone within 6" - but leaves you miraculously unharmed!

When firing a Hand Flamer place a circular 2" radius template over the target area. All troops within the area are eligible to be hit, throw for each separately. Targets hit by a Hand Flamer will receive damage as normal - and then additional damage for each Shooting Phase that the chemical is still burning. Roll a D6 at the beginning of each succeeding Shooting Phase.

1-5 The chemical is still burning - take another hit.
6 The chemical has burnt out - no damage

Whilst on fire the victim is too physically and mentally occupied to do anything other than flap around trying to beat out the flames (determine movement direction and distance randomly - move as if routed). One canister fires only one shot - it takes a complete Turn to change canisters.

The Flame Lance

The Flame Lance is a powerful laser weapon. It resembles an ordinary Lance - except that it has a small button or catch on the butt. When the button is pressed the weapon will fire a bolt of laser energy from the tip. The discharge is much greater than a normal laser weapon. The batteries are self regenerating but because the discharge is so great the weapon may only be fired 3 times in a single day - and then requires a complete Turn to reload. Roll a D6 at the beginning of each succeeding day to recharge. Each discharge causes 1D6 Strength 3 Hits. Anyone hit by a Flame Lance does not get a saving throw for armour (unless they are Heroes and then it is at the GM's discretion).

Hand Guns

Modern type Automatics and Revolvers with between 6 and 12 shots. (D6 or D12 on finding). Revolvers can be part loaded - taking 1 complete Move Phase per 2 bullets. Automatics are reloaded from magazines - taking an entire Turn to do so. Hand Guns are noisy and can attract attention from undesirable sources.

Rifles

A Rifle is a heavier large calibre version of a handgun requiring two hands to use. Obviously the performance of any rifle will depend on the weapon itself but I think we only need differentiate into 3 basic kinds.

Victorian types such a the British Martini-Henry and American Springfield. These fire a single shot which is loaded into the breach, the weapon must be reloaded after each firing. It takes 1 complete Move Phase to reload.

Early 20th Century types such as a Lee-Enfield. These have a magazine containing up to 10 bullets - varying from weapon to weapon. It takes an entire Turn to fit a new magazine, or a complete Move Phase to load a bullet into the breach. Some weapons, such as Winchesters, carry their ammunition in a tube rather than magazine and these can be part loaded like revolving pistols.

Late 20th Century types such as an Armalite. These are sophisticated weapons capable of either firing single shots or Sustained Fire. Loading is by magazine only - holding up to 20 bullets. If you wish you can fire the weapon like a machine gun - using 10+D6 number of shots up. This is called Sustained Fire. You must have at least 10 bullets left to fire in this way. When firing Sustained Fire take a 2" radius circle template, such as that used for magic, and place it over the target area. The target area can be anywhere that is visible to the firer and within the weapons maximum range. All figures within the template are eligible as targets and may be hit - throw for each separately. Figures not hit may do nothing else for the rest of that Turn - they are too busy keeping their heads down! They may not return fire that move. If you are firing Sustained Fire then you receive an Initiative modifier of +10 (as you usually get to fire first!)
Bolt Guns

Bolt guns are ultra-modern versions of contemporary automatic rifles firing an explosive self-propelling shot. The weapons tend to be heavy but 'stubby' and are usually recoilless. A Bolt pistol may fire one shot from a magazine of 5 bullets. It takes a complete Turn to change magazines. A Bolt Rifle fires either a single shot or sustained fire of 5+D6 bullets from a magazine of 12 shots. The bullets are explosive and each hit causes 1D6 actual Hits at an Attack Strength of 4. Sustained fire uses a template as for Automatic Rifles and has the same Initiative modifier - you require at least 5 bullets to fire a burst of sustained fire from a Bolt gun.

Bolt guns are prone to misfires and jams, largely because of the technical sophistication of the ammunition. If you roll a 1 on your throw 'To Hit', or your first throw 'To Hit' when firing sustained fire, then something has happened. Roll D6.

1-4 The Shell fails to ignite properly - so there is no explosive effect. Reduce the Strength Attack to 2 and only 1 Hit. Sustained fire, Strength Attack 1 and 1 Hit per target. Roll 'to hit' as normal. Armour modifier +1.

5-6 The weapon goes wrong in some more critical way - Throw another D6.

1 The weapon explodes with a template of 2" radius. All figures in the circle are eligible as targets as for Sustained Fire.

2 The weapon jams - you must roll a 4,5,6 on a D6 to unjam the weapon now. If you fail it cannot be repaired until after the game. You must reload a jammed weapon before you may fire.

3 The weapon jams - you must reload the weapon before you can fire.

4 The shot explodes prematurely - causing 1 Strength 1 Hit on you.

5 The shot explodes prematurely - causing no damage at all.

6 All of the ammunition left in the gun is accidentally triggered off at once - fire Sustained Fire onto the target. If 10D6+5 doesn't empty the magazine then fire a burst of Sustained Fire and the weapon is now out of ammunition.

Grenades

Grenades can be thrown a distance of 5" + 2" per Strength level of the thrower. Various grenades have various effects. All grenades effect an area equivalent to a circle 2" in radius, like the magic template. Place the template over the target area - all models in the area are hit. Roll a dice to hit each victim - if the first dice turns up a 1 then you have missed completely and must roll to see where the grenade has gone.

1-2 Undershot - the grenade has fallen short of the target point by 1D6 inches. If this means the grenade lands on or behind the thrower then it has gone off in his hand.

3-4 Deviation to the Left - the grenade has veered 1D6" plus 2" to the left of the target point.

5-6 Deviation to the Right - as for left.

Roll to hit each figure in the target area individually.

Ordinary fragmentation grenades explode scattering casing and shrapnel over the area - Attack Strength 2. Troops caught in the area but not hit may not do anything for the rest of that Turn, they are only concerned with keeping a low profile.

Other grenades release gases which cause effects such as Fear, Terror, Stupidity or Frenzy. Or they could contain mind controlling or hallucinogenic gases - I leave these as suggestions only. A particularly good one could cause its victims to believe they are fighting on the other side for D6 Turns.

The Vortex Grenade is one of the most powerful grenade weapons available. Once activated the mechanism forms a Vortex - anything caught up in the Vortex is instantly destroyed without any saving throw of any kind. A Vortex is a swirling disruption of the space fabric - like a black hole - and can be represented on the table by a black cardboard circle. When the Vortex is thrown, roll a D6.

1-2 Nothing happens - the grenade hums a bit - roll again next move.

3-5 The Vortex starts a normal sequence with the appearance of a 2" radius Vortex.

6 The Vortex goes through an 'accelerated sequence' - expanding to 1D6+2" radius and vanishing. Everything within the area is destroyed.

A Vortex is a perfect sphere - so it is as deep and high as it is wide. Vortices destroy all matter and energy - you cannot fire, perform magic or see across a vortex. At the beginning of each Turn following the start of a normal sequence roll a D6.

1 The Vortex fizzes out - disappears - vanishes.

2-5 The Vortex expands by 2" radius.

6 The Vortex expands to radius 8" and disappears.

A Vortex will eat into the ground - so an area occupied by a Vortex will always produce a crater. Any Vortex shrinking to zero inches will disappear and not return. Any Vortex reaching a size of 8" radius has gone through its sequence and will disappear at the end of the Turn. A moving Vortex will dig a trench along its path. A Vortex moving over figures will kill them - Heroes (and all characters at the GM's discretion) may attempt to leap aside from an expanding, activating or moving Vortex - needing a 4,5,6 on a D6 to do so. Games Masters may choose to allow Heroes to roll free of an expanding Vortex - but if the 4,5,6 throw is not made they suffer horrible injuries or mutation. The Chaos Attributes chart given in the 'Mark of Chaos' article could be used for this.
Flight Packs

A flight pack looks like a backpack with nozzles and jets, and emits a worrying smell of kerosene. A flight pack is controlled purely by leaning in the direction you want to go - so it doesn't effect your ability to carry weapons. The wearer can fly like any normal winged creature. A flight pack contains enough fuel to last for 5 Turns of flight - it takes 3 Turns to refuel any normal winged creature. A flight pack emits a worrying smell of kerosene. A flight pack is controlled purely by leaning in the direction you want to go - so it doesn't effect your ability to carry weapons. The wearer can fly like any normal winged creature. A flight pack contains enough fuel to last for 5 Turns of flight - it takes 3 Turns to refuel from a large jerry can of suitable fuel. It takes a complete Turn to put on or remove a Flight Pack.

A figure wearing one of these things is in a certain amount of danger if he is hit by an energy weapon or explosive device. Roll a D6 - if the result is 6 then role again.

1. The Pack explodes - causing 1 Strength 2 Hit on everyone within 6".
2. The Pack catches fire. Roll to put the flames out in the rout phase requiring a 6 on a D6. If you should roll a 1 whilst trying to put out the flames the pack explodes (1 above). Whilst on fire you move randomly like a man hit by a Hand Flamer, you may not fly.
3. The Pack takes off out of control using all of the fuel to fly 5 miles straight up into the air, and then you plummet straight back down again. The Games Master can dice randomly to determine where the poor flyer lands. His impact causes 1 Strength 6 Hit on anyone within 2" of his point of impact. The flyer himself receives no Saving Throw.
4. The Pack takes off and spins round out of control. During each Turn move the figure randomly - take off if landed, land if airborne and so on. The place where the flyer lands can be randomly determined by the Games Master.
5. The Pack starts to smoke and fizz noisily. Roll a D6 - in this many Turns the pack will explode causing 1 Strength 2 Hit on anyone within 6".
6. The Pack just stops working altogether.

All SF weapons can be confusing when they are found - so don't let your adventurers use them straight away. The best way to introduce, say, a laser pistol, is to describe it as a bent metal rod. Then let your players suss out for themselves what is going on. There must always be a chance a weapon will go off whilst the company are examining it - but the GM should be lenient and not get them all killed! An adventurer will require several hours to find out how to operate any simple futuristic device, and probably a similar period to find out how to reload it. If they have encountered this sort of thing before then they won't require as long - this I leave at the GM's discretion. Remember that a player finding a weapon shouldn't really know how powerful it is, or whether it needs reloading, or any possible side effects. He certainly shouldn't be able to tell one type of grenade from another - so grenades are always an unknown quantity until they are used. You can mix in non-functional or unstable weapons too; ones that either don't work or work spasmodically or in unpredictable ways. In general you can apply the following rules to finding artifacts:

A character finding an SF artifact for the first time cannot use it that game. He may use it in the next game, if he makes his Intelligence %. This is the Intelligence x10 as a percentage. For example Intelligence =6, Intelligence % = 60%. If you can roll under 60% on a D100 then you can use the weapon -only one person may try. If you fail to make the throw then try again next adventure.

A character finding an artifact similar to one he already knows how to use may spend some time trying to make it work immediately - he may do nothing else. Roll a D6 at the end of each Active Player Turn. If you score a 6 then you can use the weapon. If you score 1 then you are utterly baffled, and must give up in disgust.

Some of the weapons described above modify the Initiative of the user - as indicated in the text and on the chart below. Also some weapons either ignore the effects of armour (Ignore - on the chart) or modify the normal saving throw. So, for instance, a Hand Flamer has a plus 2 modifier - so if your normal saving throw is 4,5,6 then your modified throw will be 6. If the saving throw goes above 6 then you can't save! - this modification is inclusive of any normal modifications for a high Strength hit.

If you intend to use Futuristic weaponry, or even if you don't, I would strongly recommend changing the rules on maintaining formations - especially for games involving less than 50 figures a side. The reason for this will become clear - and can be demonstrated practically by throwing a grenade into a solid formation of troops (messy). Figures are still organised into units - which can be of any number of troops but typically is about 12. Each individual in a unit must stay within 2" of another member, although they may move closer or into base contact if they wish. The gap is measured between the base edges - not the actual models - like so:

A unit may split up. This is, in effect, the unit leader saying something like, 'You 4 men follow me and we'll storm the building from the front while the rest of you try to sneak in through the back!'. To split up a unit takes an entire Turn during which the unit must remain stationary and the leader may not fire. The rest of the unit may fire as normal. Splitting cannot be done if the unit is already in close combat. The split unit cannot split again - it can be remerged anytime. Once split the unit acts like two independent units.

When used for the first time Futuristic weapons cause Terror in the target unit. Used subsequently they cause Fear in target units. Grenades cause Fear in target units and a target unit taking casualties must take a Morale test minus 2, Heroes are exempt from these effects.

The following account is of a proposed plot outline for a Science/Fantasy crossover game involving a Games Master and at least 1 - but hopefully more - players. The GM can take the role of all encounters. I haven't given enough details to actually play the scenario - that is up to you - but I think you'll find enough information to develop the plot. The game starts with the GM assembling all of his players and giving them the background story.

THE PROPOSITION OF ERIC BORGESON

Eric Borgesson is a very wealthy Swedish banker currently living in London - 1983 - the present. Mr Borgesson, an elderly and much respected man, has placed an advert in the press. The advert goes, 'Positions still remaining within proposed Antiquarian Expedition. Objectives to investigate newly discovered remains in Pakistan - Surveyors, Cartographers, Experienced Field workers and Scientists all required. Apply...'.

You the players have answered this advert. Borgesson gives you the following information.

Recently a single mile high tower was discovered on the Pakistan/Afghanistan border. It has not previously been investigated, was discovered by an aerial survey and has not been entered.

The tower's design is consistent with it being very old - probably around 3 thousand years - and belonging to an ancient Indian culture.

The Pakistan government has agreed to the expedition taking place but is offering no help and cannot guarantee the safety of the group. There are many bandits, hill tribes and rebels not to mention possible border clashes.

Eric Borgesson has received a number of death threats from religious factions opposing the expedition - but he has dismissed these as hoaxes.

The expedition will be led by Borgesson's son Gunnar - who is controlled by the GM - and there are already some people hired. The exact number can be determined by the GM - trouble shooters, a Pakistani who speaks the lingo, a few scientists. All these are 'followers', 'hirelings' or whatever you want to call them.

The players are flown to Pakistan. You will need to travel into the hills to find the tower. The roads are impassable by car or even land-rover. The adventurers have enough money to buy mules, hire guides and buy weapons. Shotguns and pistols may be bought - the GM can determine availability and cost. The GM can determine the effects of losing baggage, catching gastro entiritis etc. as he sees fit. The journey to the border could take days or weeks - the GM can draw a map and dictate rates of travel. Possible encounters up to this point could be:

- Government spies or thugs trying to find out what you're up to.
- Religious Leaders trying to stop you.
- Bandits trying to rob you.
- Army patrols who think you're rebels.
- Russian army patrols who think you're rebels.
- Smugglers - who could maybe trade you some good automatic weaponry.
- Afghan Tribesmen who think you're Russians.
- Lost Journalists or American advisers.

The GM can play around with these ideas and any others - so that if the group are clever they can pick up some friends and more weapons.

Eventually the group reach a giant natural bowl 2 miles in diameter - in the middle stands the tower. The group can now advance upon the tower.

What nobody knows is that this is no ordinary ancient monument - in fact the tower isn't even of human construction. 100 Million years ago a spaceship came to this part of the world and before they left the aliens constructed the tower. The tower contains a powerful transportation device that can transport anyone entering it to another similar device somewhere else in the Universe. The device works as a sort of time machine as well - so it can transport over distances and through time. Unfortunately the aliens were in too much of a hurry and the machine went wrong soon after it was built, creating an area of unstable space around the tower stretching 1 mile in all directions.

The effect is that any group entering the area are transported into either another time or place - maybe in some far off universe. Wherever they are transported to the image of the Tower will remain in a constant position - perhaps as a hazy shadow, sometimes as a solid image. Sometimes the local inhabitants will be able to see the Tower, sometimes not. For example, if the adventurers are transported to Alpha Centauri when the tower is ½ a mile away then the tower will appear ½ a mile away on Alpha Centauri, and the same for time jumps - the tower remains constant. Whether they are transported through time or space moving closer or further away from the tower will always cause a time/space jump. Sometimes the mechanism stabilises for, say, a day or maybe even longer and the travelling will be able to move freely within that time/space zone without any more jumps occurring. During these periods of stability the Tower will disappear altogether, and will only reappear again when the stability breaks down. The Games Master can give rough indications of when the Tower is going to return 'in phase' by dropping hints about 'shimmering on the horizon' etc. All this I leave up to the resourceful GM to determine - but I would suggest you allow a
high % chance of any one jump stabilising for a day and an outside chance of stabilising for over a week. Then roll dice to randomly determine when the mechanism breaks down again.

For example:-

Basic chance of a jump being stable 75%.

Stable for D10 days. Roll a 10 and roll a D100 to establish number of days. Roll a 100 and roll a D6 to establish number of years.

It may be convenient to adjust these according to circumstance. If the travellers get split up they may enter different time/space zones at different times -this gives a good opportunity for added interest.

When the travellers eventually manage to reach the tower then, if they can figure out the controls, they can return to earth 1983 - or become permanently transported somewhere else if you want to continue the whole inter-galactic trans-time adventure.

The diagram below gives one possible configuration for the effects of the tower - to some extent the nature of each time/space band will be determined by what models you have available. Obviously you can put in many more bands than this, and you can put in lots of bands if you want the adventure to last for a long time.

Another possibility, rather than use strict bands of fixed time/space zones, is to draw up a chart. Then every time the adventurers enter a new band you can roll on the chart to generate the salient details of the zone. A chart could just list the nature of the zone like this:-

- 01-05 Jurassic - Earth - Dinosaur Migration
- 06-10 Iron Age - Earth - A tribal Huntin party
- 11-20 Zone Time - Zone Place - A Goblin victory celebration
- 20-30 Zone Time - Zone Place - A Futuristic Town

To continue with this sort of game again.

Another alternative is just to adopt a free form system with a chart for time and a chart for place. For examples:-

- 01-05 500BC
- 06-10 300BC
- 11-15 100BC
- 16-20 100AD
- ETC
- 01-25 EARTH
- 26-35 MARS
- 36-45 MOON
- 46-55 ALPHA CETI 1
- 56-65 DIMENSION OF THE BLACK YUNGON
- ETC

But this would require much more work on your part as you'd have to write histories for all your alien planets, Mars etc - but this would probably be the most rewarding approach if you have the time and intend to re-use the system at any time.

Whether Magic should work in all times or all places is up to you - alternative realities can have different cosmic laws after all. Eventually the adventurers can be given access to futuristic devices which allow them to control the time travelling process to some extent.

(BASE NOT INCLUDED)
Kremlo was an orphan Slann, washed up on the shores of Southern Lustria. Here he was found and adopted by the Chieften of the Norse village of Skeggi. Despite the vile and rather sickening appearance of the infant Kremlo, Harold Stoutback, who was a fine man and an outstanding foster-parent, treated him exactly as one of his own sons. Although quite why he did this is less than clear.

warriors were with Stoutback in the mountains. Kremlo, a few fishermen and the local berserkers, who had been drinking at the time, became involved in a bloody fracas with the Slann braves. Eventually after tremendous numbers of teeth, bones and limbs had been smashed or cracked, Kremlo and the settlers beat off the Slann.

A brief inspection of the corpses proved all of the Slann to be of Kremlo’s own tribe - they were BlueSpineSpicks.

Now, before this tale can be fully understood, it must be explained that each of the many tribes of the Slann were distinguished by unique markings along their spines. Kremlo was a reptile Slann, his spine was bright blue, he was of the BlueSpineSpick tribe.

That evening, while Kremlo was still floundering in a sea of rage and terminal anger, word arrived of Stoutback’s recent demise. Kremlo was now Chieftain. This had always been Stoutback’s wish and most of the village reluctantly accepted. Some, Kremlo’s two younger step-brothers mainly, were less than happy about the whole thing. But they kept quiet about it.

Anyway, life went on in the Stoutback household in a more or less normal fashion for twenty or so years, until one fateful spring day. Harold Stoutback and Ven, his oldest natural son, were out hunting in the mountains. Actually they had been ambushed and killed by bandits, but as yet no one in Skeggi knew of this. This left Kremlo as the technical leader of a Norse Thorpe; a unique position for a reptile.

He was going to regret this day - badly - but little did he realise the sort of grandiose hassle currently speeding his way through the cool oceanic streams. This sporadic phenomenon was marked by the young adult males painting their skin, forming warrior cliques and infusing sacred herbal preparations. Then, frenzied and helplessly manic as a result of these religious narcotics, they would take to the open sea for weeks, sometimes even months, and cause trouble all along the coasts of Lustria.

Kremlo was at home when about three dozen half-crazed Slann hooligans lumbered out of the water and butchered a group of fishwives who had been contentedly mending nets on the sea shore. Immediately all hell broke loose. Most of the village’s
warriors had sworn their allegiance to the Stoutback line, they were stoty, as was their way.

Kremlo led them all, as straight as he could sail, to Zapotec, his tribe's esturine home. What happened there is unknown. None of those on the boat were ever seen again.

Perhaps it would be desirable to discover their fate by gaming this tale. All the events, characters and motives are covered below.

GAMING THE LEGEND

Maps for the two encounters at Skeggi and then at the BlueSpineSpick homeland - Zapotec - are given below. Anywhere between two and six players may take part. Each player must take either one of the parts listed below.

Gamesmaster (essential)
Kremlo (essential)
The Slann
The Younger Brothers - Sven and Ben
The Berserkers
The Villagers (who have no part in the journey to Zapotec or the fighting there)
The Clansman (who are in the mountains with Harold Stoutback during the attack on Skeggi)

KREMLO

Kremlo is the central character of this tale. Whilst he is alive he may give orders to the clansmen, the Berserkers and the Villagers. He may also give orders to his brothers, they need not obey. Kremlo will not be able to openly harm his brothers in any way - unless they give him due provocation. He is not stupid though and is suspicious of them.

He also carries a phial of poison. Poured into the spawning pool, the poison will wipe out the Slann pre-born. This would be a vile deed, indeed. An awful and terrible blow against the BlueSpineSpick. If Kremlo succeeds in doing this he can treat the whole campaign as won.

Move WS BS S T W I A
35 2 2 C 1 5 1

*Note that swimming is as detailed in the Slann section below. Also from the moment the Slann first emerge from the sea at Skeggi, Kremlo is horribly manic and may, therefore, roll for FRENZY as detailed in Vol 1 of Warhammer.

Player's Objectives
Skeggi Stay Alive. Kill 4 Slann
Zapotec Poison Spawning Pools. Kill 6 Slann

THE BERSERKERS

Skeggi, like any other Norse village, has its local berserkers. These are the more aggressive of the village's headstrong young men. They tend to wear their hair long and subsist almost entirely on a diet of beer, mushrooms and herbs. Perhaps because of this, they are difficult to get along with and are often far more violent than is absolutely necessary. There are a dozen berserkers in Skeggi when the Slann land. They are all in the Ale Hut. One player plays the leader of the Berserkers, should he be killed another leader is selected and if possible another player should take over. All the berserkers have the following characteristics.

Move WS BS S T W I A
4 3 3 2 B 1 4 1

All berserkers are able to roll for FRENZY as detailed in volume 1 of Warhammer. If the engagement at Skeggi is not played then use only 9 berserkers at Zapotec.

Players Objectives
Skeggi Kill at least 7 Slann. Lose from 2 to 4 men.
Zapotec Lose 2 to 5 men. Kill at least 8 Slann.

THE YOUNGER BROTHERS

There are two younger brothers, Ben (20) and Sven (18). Obviously they are both quite unhappy about Kremlo's claiming of the Chieftainship. There is, however, very little they can do about it publicly. If it became known that they had murdered Kremlo they would be exiled from Skeggi, and possibly stoned. If, however, they could do away with Kremlo without anybody knowing, then they would be more than happy.

Move WS BS S T W I A
Ben 3 5 2 2 B 1 3 1
Sven 4 3 4 1 B 1 3 1

If Kremlo is ever killed in a battle then the player who was controlling him should instantly start playing the younger brother if he is still alive. Sven cannot become Chieftain unless Ben is out of the way......

Players Objectives
Skeggi Both Stay Alive. Kill Kremlo

THE VILLAGERS

At the time of the Slann raid there are only the berserkers and the villagers around. There will be 1D6 villages in each hut (use 5 huts to represent the village and Citadel Townsfolk to represent the villagers). There are also a dozen fishwives at the waters edge. They will be in a single group and subject to FRENZY should any of their number be killed.

Move WS BS S T W I A
Villager 4/5 2 2 2 B 1 2 1
Fishwife 3 2 2 2 B 1 1 1

Use Citadel Codes C32 for the villagers. They will be armed with swords and may be carrying shields.
Player's Objectives

Lose no more than 20 casualties - counting the fishwives as double.

THE CLANSMEN

The Lords and Warriors of Skeggi are hunting with Stoutback and play no part in the first encounter. Sworn servants of the Stoutback family they are loyal to its head. Like the younger brothers, they are unhappy about being led by, what to all appearances, is a large frog. However, whilst he is alive they are committed to being loyal towards Kremlo. If they see either Ben or Sven kill Kremlo they will avenge him. If Kremlo dies for some other reason the Warriors will obey the oldest surviving brother.

There are 12 clansman aboard the ship that attacks Zapotec. They may be either wearing mail armour and have two-handed axes and smaller throwing axes, or alternatively, they may have bow and sword.

*Throwing axe only. Abilities with other missile weapons would be 2.

THE SLANN

The Slann Empire lies in decline, along the gulf coast of Central Lustria. They are an exceedingly ancient race, some say that they are older even than the Elves (though they are very wrong). The Slann Empire was at the peak of its power and sophistication when the first Sea Elf explorers arrived. Within a few years large numbers of Elf and Norse began to arrive in Lustria, attracted in particular to Krox’s wealth of Gemstones and gold.

The strange magic and diseases brought with them by the Elves soon reduced Krox to an embittered and embattled outpost at the centre of the once vast Empire.

Slann are determined fighters. They stand about two metres tall and are green, blue, grey or sometimes yellow in colour. There is a small Imperial army which increasingly uses lobotomised human eunuch warrior-slaves to make up for shortfalls in Slann numbers. Warriors of the Imperial army will wear armour made of shell or of gold. Tribesmen wear only shell and skins.

Being semi-aquatic they are good swimmers and move 4" swimming on the surface and 3" when swimming underwater. They may do this even when wearing armour and carrying weapons. A Slann who attacks a Norseman in the water will finish him off in one move - there is no need to dice for the result as it is something of a foregone conclusion.

Roll 4D6 to determine the number of braves attacking the village at Skeggi. At Zapotec use the instructions on the map to determine the quantity of attackers.
Below are the characteristics of the Slann. Special Slann models will shortly be released by Citadel.

<th>Attack Strength</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-6&quot;</td>
<td>6-12&quot;</td>
<td>1-Weak</td>
</tr>
</tbody>
</table>

Blowpipes ignore the to hit modifiers given on page 16 of volume 1 of Warhammer. All hits must save against poison.

**With tomahawks and knives. Each brave will carry a good stock of both.

The Slann sentries marked on the second map are floating submerged with just their eyes above the water. They will never be seen unless they move or shoot their blowdarts. Then they can be seen by anyone within 6".

There are 3 detachments of Imperial troops posted at Zapotec. They are led by a single Herald. The Slann player is represented by this single model. Should he be killed then one of the Low Swamp Guards, and possibly a different player, will take over. Subject to the number of models you have available the Slann player or the GM may select any 3 units from the list below.

4 Low Swamp Guards
1 Herald, 6 Soldiers
1 Low Swamp Guard, 5D6 Tribesmen
1 Low Swamp Guard, 2D6 Tribesmen with blowpipes
1 Slave Warrior Leader, 5D4 Slave Warriors

Player's Objectives

Skeggi: Kill a Dozen Norse. Lose no more than 6 Braves
Zapotec: Kill all the Norse. Protect the Spawning Pools.

THE LONGBOAT

The Stoutback’s war boat, the ‘Golden Esmarelda’, can be represented by any 1/72nd scale plastic or wood kit model, or scratchbuilt. In the river it may be rowed - but the sail is not used. The speed at which it moves will depend on the number of rowers.

<table>
<thead>
<tr>
<th>Rowers</th>
<th>Upstream</th>
<th>Downstream</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-4</td>
<td>Can’t move</td>
<td>4&quot;</td>

0 1 2
**ALCOHOLISM**

Certain groups or characters can be subject to ALCOHOLISM. Every time any kind of action or fighting begins roll 2D6 for each group of alcoholics.

Result

2-5 Only just started the days drinking - no effect
6 Roxy Glow - Initiative -2
7 Intoxicated - Initiative -2, Weaponkills and Bowkills both minus 2.
8 Drunk - As Intoxicated but the figure has already lost most of his or her ability to feel pain and so may take an extra Wound point.
9 Roaring Drunk - As Drunk, also the figure becomes subject to 'Stupidity'.
10 Senseless. As Roaring Drunk but the Initiative penalty is increased to -3, as are the Weaponkills and Bowkills penalties. Throw D6 for each blow:

\[1,2,3 +2 'To Kill'
\[4,5,6 -2 'To Kill'

11-12 Blind Drunk. As 'Senseless' but the figure also becomes subject to the following rules:-

a. May only see things within 12"
b. Is subject to Drunken Frenzy. Must make a roll for Frenzy each turn enemy are in sight.
c. Roll 2D6 at the end of your Active Turn. A Score of 2 and the figure has drunk himself sober and suffers no further alcoholic effects. If, however, the score on the two dice is 11 or 12 then the figure passes out for 2D6 Turns. Roll again for alcoholism when he comes round.

Some types are more or less alcoholic than others - this is expressed as a plus or minus modifier in the same way as Stupidity (see Warhammer vol. 1). The Skeggi berserkers are always very drunk so are subject to Alcoholism +2. Other Warhammer types subject to Alcoholism are:-

10% of Halflings
15% of Dwarves
15% of Orcs
Hill Giants are ALL subject to ALCOHOLISM +3. Elves, of course, are all committed temperance workers and never touch a drop (except for strictly medicinal purposes).

Of course as the poor alcoholic becomes gradually more inebriated his usual personal characteristics may become altered. For example a character normally sophisticated and charming may find it hard to be charismatic whilst staggering through a miasma of brown ale, cheap whisky and onion crisps. Accordingly the personal characteristics can be altered by the Games Master as drinking proceeds.

Accordingly the personal characteristics can be altered by the Games Master as drinking proceeds.

<table>
<thead>
<tr>

<td>-6</td>
<td>-6</td>
<td>+6</td>
</tr>
</tbody>
</table>

Wizards who like to tipple can be a particular hazard - through the babblings of alcoholic stupor a magical accident is almost inevitable. Accordingly increase the Fumble Factor by +1 for Alcoholic Wizards (even when sober) and by the additional penalties indicated for Fumbles when drinking. Alcoholic Wizards always roll for Fumbles everytime they cast a spell.

Players and Games Masters are invited to elaborate and further expand the rules on Alcoholism - who knows one day we may well see the emergence of Alcoholics as a character class, and then...... Anti-Alcoholics.

RICHARD HALLIWELL

...can you survive an encounter with Dr Gostalo's Amazing Inter-Galactic Psycho-Circus?
...can you handle Fear and Loathing in Los Asteros?
...can you uncover the fate of Herst Crabbe's Fabulous Skystar?

Find out with Rogue Trader - adventure, mayhem and destruction on a cosmic scale.

C100 SPACEFARERS

40p each
These are the rules we use for Chaos creatures in our Warhammer Games, they are quite simple to adjust for use in other role-playing or fantasy battle systems.

Chaotic Attributes are the strange powers, disfigurations and mutations that mark the bodies and souls of many creatures whose lives have been touched by Chaos. Merely dwelling in a portion of the Multiverse where Chaos lurks close by will bring the curse of the Mark of Chaos upon a section of the population. In human society to bear the Mark is to be an outcast, but Goblins, Orcs and the like regard it as an honour and a blessing.

Evil creatures tread a path very close to that of Chaos, and all evil or unpleasant beings (including humans) have a particular chance of bearing Chaos Attributes.

Chaotic Attributes may take a characters fighting characteristics beyond the normal limits for his race.

</tbody>
</table>
CHAO T CATTTS  are given as a percentage chance, throw for each creature in the regiment. If it is found to have Chaotic Attributes, throw a D6:

| 1,2 | One Attribute |
| 3   | Two Attributes |
| 4   | Three Attributes |
| 5,6 | D6 Attributes |

If the first creature in a regiment to be thrown for is found to have Chaotic Attributes, then there is a chance equal to the Chaotic Attribute that the whole regiment has identical Attributes; this can produce a particular monstrous bunch of beasties!

A quick method of discovering how many creatures with Attributes there are in a regiment is to multiply the chance per creature by 5 and throw for each group of 5 creatures. If the score is achieved then just one of these has Chaotic Attributes.

CREATURES OF CHAOS

Some creatures are designated as 'CREATURES OF CHAOS', those have a particular affinity with the darkness of Chaos, and have a higher chance of Chaotic Attributes. Creatures of Chaos are always thrown for separately - the whole regiment never has the same attributes, and if a creature is found to have Chaotic Attributes, it always has D6 of them.

CHAMPIONS OF CHAOS

Those who ally themselves with the dark forces of Chaos can gain great power, but as their affinity with Chaos increases, their very body and soul may be distorted, until eventually they are not even recognisable as human, this is simulated by gradually gaining Chaotic Attributes. More of this in a future article.

SPAWN OF CHAOS

Once a creature has more than 6 Chaotic Attributes, it will scarcely be recognisable as the species it once was. At the same time its mind and soul will have given themselves over entirely to their Chaos masters; it will not have a trace of sanity left.

Such sad beasts are the CHAOS SPAWN, they roam in packs with others of their kind at the bidding of the CHAOS GODS.

Favoured CHAMPIONS OF CHAOS may be granted members of the Chaos Pack as bodyguards, steeds or beasts of burden, and as a reminder of what they may soon become!

Generate Spawn of Chaos by giving 5+D6 Attributes to any randomly generated creature.

REGIMENTAL TOTEMS

Those creatures with the mark of Chaos visible upon them are often regarded with great pride or affection by their fellows. Thus a particularly striking, silly or impressive looking...
A member of a regiment may be regarded as acting exactly like a regimental standard. Creatures equipped to produce loud and strange noises, with a trunk for instance, can also be regarded as a regimental musician.

Creatures with WEAPONMASTER, GREAT HORNS, CHAOS LORD, HIDEOUS APPEARANCE, MANIC FIGHTER, BREATHES FIRE, MAGICIAN or any particular advantageous attribute or combination of attributes, will be a regimental officer.

**RANDOM GENERATION OF NON USEFUL ATTRIBUTES**

01-02 Skull Face  
03 Flaming Skull Face  
04-05 Rotting Flesh (Zombie Faced)  
06-20 Bestial Face, Goat Head, Snout, Trunk, Muzzle etc.  
21-23 Crest, Wattle or crest instead of hair.  
24-26 Hunchback  
27-30 One Eye  
31-33 Three Eyes  
34-36 Tail  
37-39 Cloven Feet  
40-42 Pin-Head  
43-45 Huge Head  
46-48 Long Neck  
49-50 Hoppers, One large leg and foot - hops along at half speed.  
51-53 Headless. Face elsewhere on body  
54-56 Furry, Halve Strength, Toughness and move distance.  
57-59 Tentacles. Tentacles instead of arms.  
60-62 One Eye  
63-65 Three Eyes  
66-68 Tail  
69-71 Cloven Feet  
72-74 Re-arranged Facial Features. Swap round eyes, mouth, nose and ears.  
75-77 Sealy Skin  
78-80 Vividly Coloured Skin  
81-83 Brightly Pattered Skin - Stripes, Dots etc  
84-86 Game Master's Choice. Invent something silly or inconvenient.  
87-89 Bulging Eyes - Like a Frog  
90-92 Eyestalks  
93-95 Enormously Fat  
96-98 Long Legs  
99-00 Short Legs - half movement distance.

**CHAOTIC ATTRIBUTES**

**BLOOD RAGE**

The individual becomes subject to FRENZY

**BREATHES FIRE**

Creatures larger than man-sized breathe fire with the same template as a Dragon (4x2") - Range 12", Attack Strength 3. Man sized or smaller creatures have a template of 2"x1" - range 6" and Attack Strength of 2.

**CROSS BREED**

The creature has the attributes of a cross breed between the basic species of the creature and another randomly determined species. Monsters will be crossed with humans about 30% of the time. You have to determine your own rules for the resulting hybrid.

**CHAOS SPAWN**

Throw D10 additional Chaotic Attributes. The creature will gain an additional attribute each month.

**CHAOS LORD**

This creature has been favoured by the Gods of Chaos, and is chosen to lead it's fellows. It will take D4 extra Wounds for it's species. Add D4 to each of - Initiative, Strength and Toughness.

There is a 50% chance of being granted each of the following (throw for each):

1. A complete suit of Chaos Armour  
2. Wizard's Powers (Throw Randomly)  
3. D6 Extra Chaotic Attributes  
4. A Demon Sword

**EVIL EYE**

If any figure comes within 4" of this creature it has a 50% chance of being unfortunate enough to meet it's gaze! This will thoroughly screw up the figures Karma, and he will be subject to a disadvantage modifier of 1 on all dice rolled for as long as the creature with Evil Eye lives.

**GREAT FANGS**

The creature bites with the effect appropriate for its size but with plus 1 to kill and minus 1 from the opponents Saving Throw.

**GREAT HORNS OR TUSKS**

The creature may charge as a mounted lancer. Plus 1 to kill.

**HIDEOUS APPEARANCE**

The creature causes TERROR in those smaller than itself, FEAR in others.

**HORRIBLE STENCH**

The creature smells very badly. Throw D6, this is the range of the stench. All figures who can smell the creature will be subject to a disadvantage modifier of 1 on all dice rolled. Elves (a fastidious bunch) will not approach within range of the smell. The creatures regimental comrades will be entirely used to the smell, and will be quite proud of it's effects on others, add two to their Morale Dice.

**HYPNOTIC GAZE**

The creature may fix it's gaze on one opponent at a time within 6". If it then throws a 5 or 6 on a D6, it's victim is fixated, and may make no actions at all. The victim will remain fixated as long as the creatures gaze remains upon it. Once the victim is free of the creatures gaze, it needs to throw a 5 or 6 on a D6 to start to act again.

**IRON HARD SKIN**

The creature has chitinous, warty or scaled skin, which gives it an additional saving throw of 4,5,6 on a D6 after any saving throws for armour. If this throw is made, any non-magical weapon striking the creature will break.

**LONG LIMBS**

Plus 2 to Initiative - Plus 2 to 'to hit' throw.

**LONG SPINES OR SPIKES ON BODY**

Any figure in combat with this creature has a 1 in 3 chance of spiking himself - counting as a Strength 1 Attack. 10% of such creatures are poisonous.

**MACE TAIL**

The creature has a tail with a knobbly 'mace' on the tip, rather like some dinosaurs. This can be used as a weapon with no deduction for using two weapons.
MAGICALLY RESISTANT

Has a saving throw of 4, 5, 6 on a D6 against any Magical attack.

MAGICALLY IMMUNE

Magic has absolutely no effect upon this creature.

MASSIVE INTELLECT

The creature is hyper-intelligent. He always makes the right decision, and knows everything the Gamesmaster knows.

MORONIC

The creature is incredibly stupid. When ever anything that requires the least thought is required of it, fighting, running, going through a doorway etc, there is a 1 in 6 chance of it getting it wrong in some calamitous manner. Drools a lot.

MINDLESS

A total automaton! simply obeys the commands of whoever currently holds sway over it. Ignores morale and the effects of Wounds.

MANIC FIGHTER

HATES any enemy regiment or figure that comes within 12" of it. Not subject to Morale.

MULTIPLE ARMS

Throw a D6

1-4 Two extra arms
5-6 Four extra arms

MULTIPLE HEADS

Throw a D6

1-5 One extra head
6 Two extra heads

MAGICIAN

Creature is a Wizard, generate randomly as in BOOK OF SPELLS.

PREHENSILE TAIL

The creature has a prehensile tail capable of wielding an additional weapon or shield.

POWERFUL LEGS

Kangaroo like legs, make normal move, then leap half as far again, leaping over troops if desired, and appearing behind opponents.

POISONOUS BITE

The creatures bite is poisonous.

PLAGUE BEARER

The creature carries a vile disease. The Gamesmaster must determine its incubation period and effect. Anyone bitten stands an 80% chance of infection, clawed or scratched 60%, struck by weapon 40%, in close combat 20% and within 2" proximity 5%. Its fellows will usually be immune.

QUADRUPED

If the creature is humanoid, its arms become forelegs, a creature that normally goes on all fours now walks erect, with forelegs becoming arms.

RAPID REGENERATION

The creature has regenerative powers at greater than normal rate - roll twice to regenerate.

RAZOR SHARP CLAWS OR PINCERS

These strike as swords, with a plus 1 'to kill' and minus 1 from the opponents saving throw.

REGENERATION

The creature has regenerative powers.

SCORPION TAIL

Throw a D6

1-2 Non-Poisonous
4-6 Poisonous

The tail strikes with a plus 2 'to hit' whenever the creature would be eligible to bite. The non-poisonous variety strikes with the effect of a sword. The poisonous variety has an Attack Strength of ID 10.

SNAKE TAIL

The creature has a tail which terminates in the head of a snake. This attacks with a Strength of 1. There is a 50% chance of the snake's bite being poisonous, Strength D6.

SPITS ACID

When the creature is entitled to bite, it may instead spit acid.

Throw a D6

1-2 No effect
3-4 Hit - must make saving throw, or agonising effects of the acid score the equivalent of a kill.
5-6 Hit in the face - blinded and killed as above. No saving throw unless face protection is worn.

VAMPIRE

The creature becomes a Vampire - requiring massive meals of human blood to survive. Generate Initial Life Energy level as D6x200 - see the rules for Vampires in the additional rules article.

VERY AGILE

2 Extra blows in combat and an extra saving throw of 5, 6 on a D6 in combat - 4, 5, 6 against missile fire.

VERY FAST

Double move distances, and number of blows in combat. Double Initiative.

VERY STRONG

Add 2 to Strength Grade.

WEAPONSMASTER

Add 6 to the creatures weaponskill with any one favoured weapon.
WINGS

Creature is winged, either feathered or reptilian.

Throw a D6

1-2 Small Wings
3-4 Medium Wings
5-6 Enormous wings

Small wings are useless and cannot be used to fly. Medium sized wings enable flight as normal. Huge wings allow normal flight - but are a bit cumbersome on the ground - trailing, getting dirty and tripping up the creature. Halve movement distance when on the ground - movement through woods becomes impossible. Movement in small buildings is at 1" per turn.

Duplicate Results

If the same result comes up more than once, double its effect or accentuate it in some appropriate way. Some results will tend to cancel each other out. The Gamesmaster should not slavishly follow the results from rolling on these charts (or from any other part of the Warhammer system), but should use them whenever possible as a basis for using his imagination to the full; creating creatures for his players to encounter, if rolling a few characteristics seems to be creating an interesting beast, then let your own creativity take over to finish it off, and you will have the satisfaction of coming up with something really special.

Fighting Characteristics

Creatures bearing the Mark of Chaos are often bigger, tougher, faster or meaner than their untainted fellows. On the Random Generation Chart we indicate rough guides for the Gamesmaster for modifications to the beasts' fighting characteristics if it has particular Attributes. Fractions should usually be rounded down.

EXAMPLES OF CHAOTIC ATTRIBUTES

1. ZYGOR SNAKE-ARMS

Zygor the Night Goblin has been determined to have Chaotic Attributes; we throw a D6 to determine how many - a 4, giving him 3 attributes. Three throws on a D100 give us 50, 84 and 91. PREHENSILE TAIL, and two NON-USEFUL ATTRIBUTES, we throw again for these; 52 and 57: HEADLESS AND TENTACLES.

So we decide that Zygor has three tentacle like prehensile tails instead of arms and that his face is situated in the middle of his body.

2. LEAPING SLOMM TWO-FACE

As Trolls are Creatures of Chaos, Slomm the Troll, gets D6 Attributes. We roll the dice and find that he has 4:

POWERFUL LEGS
GREAT FANGS
MULTIPLE HEADS (one extra)
BESTIAL FACE (a)

We decide quite arbitrarily that Slomm has the heads of a Walrus, this fits quite well with Great Fangs. Slomm's Attributes give him plus one to his Wounds, Initiative and Toughness beyond the attributes of a normal Two-Headed Troll, and each of his heads bites with +1 'to kill' and -1 from his opponents saving throw.
3. NGAARANH: SPAWN OF CHAOS

Ngaaranh was once a Harpy, but centuries of unspeakable deeds serving in the marauding pack of the vile Chaos Godling known only as Kka (and those who are wise speak that name only in whispers), have twisted her body and soul to the shapes of Chaos. She now runs, gross and unrecognisable, with the other creatures of the Chaos Pack.

Ngaaranh is honoured with 3+D6 Attributes. The D6 comes up 3 - 8 Attributes.

GUARDIANED: (We decided that she will have four human type arms and hands which function as quadruped legs.
EVIL EYE
IRON HARD SKIN
MULTIPLE HEADS (2 Extra - we decide this will increase the Effect of the Evil Eye by 20%)
BREATHES FIRE 4x2" Template range 12" Strength 3 for each head
EYESTALKS 120" Range
STENCH
CREST We give the poor girl wattles instead of hair.

Move 4" and Flight
WS 4
Strength 3
Toughness E plus 4, 5, 6 weapon breaking saving throw
Wounds 4
Initiative 4
Attacks 3 Bites +3 Fire + Strengh + Evil Eye 80%.

This repulsive creature is very tough indeed, with her various powers she could do a lot of damage to any normal unit of troops. Her appearance is horrific too, so she causes FEAR in all troops, and TERROR in units of man sized or smaller less than 10 strong.

CHAOTIC ATTRIBUTES AND TABLETOP BATTLES

Now that we've gone through the rules for Chaotic Attributes and most of you have rolled up a few trial monsters, you are no doubt asking how to go about providing models of them to use in your battles.

When you have determined that a member of, say, a Goblin regiment, has Attributes, and discovered what they are, it is possible to use your imagination to picture the creature, while using the original model to represent it on the table. Once the battle is underway you should soon stop thinking of it simply as another Goblin, as you picture its wings, fangs and extra arms. Blue-tack can be used to model on temporary arms, tails, heads etc and will not damage the models paint job. The stage beyond this is to actually provide models of the Chaos creatures you use. Citadel will be manufacturing various Creatures of Chaos in our WARHAMMER range, but it is very satisfying to set about converting and constructing your own.

Citadel produce a list of spare bits and pieces that are available separately (send us a stamped SAE) but it is by no means exhaustive; any piece that is cast by us is available separately, give us a ring or drop us a line if you're after something in particular. If demand is sufficient we also hope to produce sets of heads, torsos and limbs to assemble as you wish.

All this adds 2 each to our ex-Harpy's Wounds, Toughness and Initiative.

MOVE 4"
WS 4
Strength 3
Toughness E plus 4, 5, 6 weapon breaking saving throw
Wounds 4
Initiative 4
Attacks 3 Bites +3 Fire + Strengh + Evil Eye 80%.

In our own games we have a convention that Creatures of Chaos are only permitted if a model is provided. There is no way that our collection could encompass all possible eventualities, so we have a system which compromises between variety and visual appeal.

When the dice roll reveals that an Ore regiment has a member bearing the Mark of Chaos, he can only be used if his commander has an Ore model with a suitable number of Chaotic Attributes available. Obviously the model will already have specific physical Attributes, and it is assumed that if a physical mutation is rolled it is automatically changed to one the Ore model already has. Attributes which do not involve a change to physical appearance remain as rolled.

The player must therefore have an Ore model with the right number of physically evident Attributes to be able to use it (Blue-tack can still be used to add the odd tentacle or whatever).

Extra points must be paid for these creatures powers, otherwise everyone would by busy converting models with the most advantageous physical changes.
CONVERSION EXAMPLE - XAXUS CHAOS-THRALL

Xaxus has been determined to have six Chaotic Attributes.

GREAT HORNS
CROSS BREED (with a Dwarf)
LONG NECK
MASSIVE INTELLECT
QUADRUPED

This gives Xaxus Fighting Characteristics between those of a Dwarf and a Man, with additions to his Toughness, Intelligence and Wounds due to his Attributes:

Move 6"
Weapon Skill 4
Strength 2
Toughness C
Wounds 2
Initiative 5
Attacks 1
Charges as a Mounted Lancer - +1 'To Kill'

As a quadruped Xaxus cannot wield weapons, fortunately he can use his great horns; he would be able to bear an ally into battle, perhaps a Lesser Goblin or Kobald slave or assistant. He is quite powerful in combat, but his greatest advantage is his mighty intellect, which will make him greatly valued amongst the Hordes of Chaos.

THE CONVERSION

YOU WILL NEED

Razor Saw
Brass or Copper Wire
Pliers
Modelling Knife
Modelling Putty: Milliput
Handy-Strip
Tuff-Stuff or similar
Instant Glue or Epoxy
Pin Vice or Drill

All of these can be had from your local model shop. Remember, you can give yourself a very nasty cut with a razor saw, pin vice or modelling knife, younger readers should be sure to have their parents go over the instructions with them before they attempt the project.

So we have a horned Dwarf-man in quadruped form. The body was the first thing I picked; a smooth coated form would seem best for an ex-Human, and it had to be small enough so as to seem appropriate with a Dwarf's head perched on top of it. I came down on either the Ral Partha Trollhound or the Citadel Weretiger in Beast Form. I chose the latter because it has Human hands instead of front paws.

The Tiger head needs removing carefully, sawing all the way round with the razor saw is the best plan, then just twist it off with pliers. If you pad the pliers with a rag you can take the head off without damaging it and use it in a future conversion.

The new head is that of a Dwarf. I chose a bareheaded one so that it could be seen to have actual horns rather than a horned helmet. I decided to add the wire frame for horns before beheading the model so that I could be sure to have something to grip while I drilled.

Horns are best added by drilling right through the head so that a length of wire can be passed through the head, glued and bent into shape. I use a pin vice for drilling holes; it's probably the most useful tool of all and a bit like a propelling pencil which holds a small drill bit, much more controllable than any of the expensive electric mini-drills. A pin vice is invaluable for drilling holes into components so that they can be permanently fixed together with a short length of wire and glue, there is then no chance of your prized conversion ever coming apart.

Once your horns are fixed and dry, you can use the razor saw and pliers routine again to remove the Dwarf's head. The basis for the long neck as a 25mm length of wire. A hole about 4mm deep is drilled into the stump of the Weretiger's neck, and a matching one up into the Dwarf's head. The wire is glued into the tiger and the head glued to the other end.

When all this is dry it can be bent into a natural looking pose. The horns should be given proper shape with a coating of putty, and a slender neck and beard modelled on. All that then remains is to undercoat, paint and varnish your model (I gave him a Lesser Goblin rider too) and your simple conversion is unique model; people will ask you where you bought it! The Tiger head and Dwarf body could form the basis of your next project.

BRYAN ANSELL
Thank you everybody who has written to us over the past few months. Our factory has been almost literally flooded with letters about our models and especially about our new game - Warhammer. Well I hope that either Bryan or myself have been able to answer your questions satisfactorily. Quite often we’ve had to re- think some of our own ideas as a result of your letters - all very useful stuff on the whole.

Sifting through all of our correspondence I did notice that 1 or 2 questions did keep cropping up time and time again, and I thought that it would be a good idea to try and answer some of these questions via the Compendium; so was spawned the idea for this - the first Citadel letters column. We hope to make the column a regular feature of future Compendiums, with representative questions and letters about gaming and modelling with Citadel figures. So - if you’ve ever wanted to know the best glue to use on our products, why we don’t make models for certain things, or even if you just want to tell us about an idea or tip of your own, then why not drop us a line. We’ll be really pleased to hear from any of you - and any letters which we feel will be useful and interesting to your fellow gamers we’ll publish. Letters about Warhammer will be doubly welcome - especially really good ideas for scenarios, or an interesting account of a campaign or battle.

For starters I’ve dug out some of the more interesting letters sent to us in recent times. Thank you contributors! your efforts are appreciated.

Dear Bryan,

You’ll be pleased to know that Warhammer lives up to my every expectation, high though they were, the artwork is brill throughout. The rules are as comprehensive as I had hoped and yet the actual playing is quick, easy and very enjoyable with a clever balance of realism and playability - whether at mass combat level or with a handful of figures.

As for characters - a simple, comprehensive and realistic system surpassing most of the other systems I’ve tried (a dozen or so). However, I would like to know what you’ve got against Halflings as Player Characters, and there seem to be a few notable omissions in the Creature Lists, I mean to say, what have Gnomes ever done to you - totally ignored, poor things, and considering Ral Partha make a whole range of them (formerly Dwarves - obviously shrunk).

Cheers

Harry

Dear Bryan - yes low level characters do pop off pretty easily, they should be more careful. The rules for Character Advancement do allow for characters to sustain injuries rather than actually die though. We always consider a Tailored character to be just 'out of combat' - but whether dead, injured or just unconscious we resolve after the game using the Injuries rules on p16 of Vol 3.

Question 1, I think, you will find fully answered elsewhere so I’ll say nothing here. Question 2 - we left the 1500 points level as the practical maximum for characters for the initial Warhammer game. Further supplements and articles are planned to take characters onto greater things - special characteristics, divine aid, new skills and abilities and much more.

Dear Harry - Tony Ackland was responsible for the artwork in Warhammer, and is engaged on new projects for our first Warhammer supplement at the moment. As for characters - well lack of space prevented the inclusion of rules for developing Halflings as PCs, and ditto Gnomes.

Bryan

Dear Sirs,

My initial reaction to Warhammer is that they are very good for mass combat, but the FRP 'D&D style' characters rules will be lethal for low level characters. I have found some points to be unclear, however, and would be grateful to receive any errata information you have available. In particular perhaps you could answer the following questions:

1. Vol1 p5 - Turn sequence phase states 'All players may shoot with suitably armed troops'. Yet Vol1 p15 Shooting - states 'active player may shoot once with missile armed troops.' Which is correct.

3. In Vol1 p8 there is mention of Supplements to Warhammer with reference to Specialist Magic. How many supplements do you envisage? When do you expect them to be released and what will they contain.

Yours

Tony Ellam
Dear Sirs,

I've been a keen collector of your excellent models for over a year now, and recently I've bought a few of your larger figures - a Red Dragon and the Ral Partha Golden Dragon amongst them. I would be very grateful for any advice you could give me about assembling these models - and what is the best way to paint them. I've been using 'Araldite' two-part epoxy - the fast-setting type - and 'Humbrol' enamel to paint the models with. These are O.K - in fact I'm very pleased with the results! But I saw your painted display at 'Salute' this year and was bowled over by them - perhaps you would be kind enough to let me into your secret.

Yours
G. Miller - Nottingham

Dear Mr Miller - It's nice to hear from someone who both collects our models and goes to the hobby 'conventions'. Lots of people don't realise that Citadel have a complete painted display and sales unit which we take around the country to modelling and wargaming events. Next year (84) we hope to have our travelling game display ready, which should be pretty spectacular and hopefully create lots of interest from the general public as well as experienced gamers. Our painted display has been assembled by Tony Ackland - our staff artist - and includes models from his own collection. Tony has written an article for the Compendium (which you will find elsewhere) in which he gives tips on just these points - together with hints on buying brushes, paint and other materials. Personally I prefer Acrylic paint to enamel - no turps, no mess, kinder on brushes, nice bright colours - but I know Tony uses all sorts of paint including Enamels. Whether you use enamel or water colour it's always best to paint the model white first and let it dry thoroughly. Then any paint you apply over the top will have a solid 'grip' and a good strong colour. - Rick

Dear Citadel,

I have a query about your models for which I would appreciate an answer. I have bought quite a few figures, both from Citadel and other manufacturers, and, whilst the detail on Citadel models far outclasses anything anyone else has to offer it does seem to me that the quality of casting is sometimes not all it should be. In particular in my most recent order some of the models were a most strange blueish colour which made them look 'tatty', and some of the models had extra little pieces of metal that didn't ought to be there. Of course once cleaned up and painted the models looked as good as all the rest I've bought off you - but is this an indication, perhaps, of falling standards amongst your products generally?

Yours P Withers

Dear Mr Withers - Citadel models are made from a special alloy which experience has shown to be most suitable for the sort of castings we produce. This has the advantage of being able to capture the maximum amount of detail - without blurring or distorting the model. The actual colour of the metal can sometimes be quite dull, or even, as you point out, bluish or gold. Lead - or alloys with a very high lead content, such as are used by some companies - can produce a very shiny finish, but tend to lose clarity of detail and may produce large unsightly 'blow-holes'. So really the finish can be deceptive, just because a model is shiny doesn't mean it is well cast. Strands of metal occur where the mould has been vented to let out air from the cavity - these usually come off as the castings are removed from the mould. But if not they can be 'tweaked' off easily. If you have a model like this then it won't be a bad casting - in fact it is a sign that the mould has filled up properly without trapping air. Sometimes wafer thin metal can form around a casting - this is called 'flash'. Flashing can occur for several reasons - the most common is that the mould is slightly hot. Flash can easily be removed with a modelling knife or files. Sometimes a very slight amount of flash forms all the way round a model in which case it is called a casting line and can be removed with files. - Rick

This illustration is one of the many to come from the talented pen of Robert Lingwood. Although not strictly a letter, I hope to have the opportunity to print more ideas and artwork within this column. This particular drawing is of the 'Fenmen' of the 'Redwake River Valley scenario' in Warhammer volume 3.

### Magic Spells

- **Halfling** = Halfling

--
Has your imagination and role-playing skill outgrown your current adventure game? Are you looking for the system on which to base your own adventure world? Then consider RUNEQUEST - role-playing adventure without frontiers:

* RUNEQUEST combat is realistic, but the system used is playable and won't slow down adventures.

* RUNEQUEST magic demands player-character skill. Battle Magic, which is available to all adventurers, enhances personal abilities. The more powerful Rune Magics require cult training and experience for full effect.

* RUNEQUEST gives you an adventure world. This world is Glorantha, a mythical continent, which is fully mapped and described in the RuneQuest rules and supplements.

* RUNEQUEST adventures are now available in solo format. See SoloQuest - three introductory scenarios; Scorpion Hall - a tough citadel adventure; and The Snow King's Bride - a complete solo campaign.

* RUNEQUEST evolves and develops with players' needs providing scenarios, figures and facts.

RuneQuest - For People Who Prefer Role-Play To Hack-And-Slay

RuneQuest is Chaosium Inc.'s trademark for its fantasy role-playing game. Produced under licence in the UK by GAMES WORKSHOP Ltd. The Official UK RuneQuest figures are manufactured by CITADEL MINIATURES.
